SENIOR FULL STACK SOFTWARE ENGINEER

9+ YEARS

Senior full stack engineer with nine years across the C#/.NET stack, Flutter and modern frontend work. Owns projects end to end, including backend architecture, APIs and data modelling through release for leading international hotel groups and top-tier e-commerce platforms.

EXPERIENCE

Senior Full Stack Software Engineer — Hyntech LTD (*Remote*)

2019 — Present

- Own all Umbraco CMS-based .NET projects end to end, from solution architecture and CI on Appveyor/Azure through to production release on IIS.
- Design and ship cross-platform Flutter applications for web, iOS and Android, publishing through the App Store and Google Play developer consoles.
- Build, test and maintain Shopify, WordPress, Wix and Squarespace storefronts and sites, including bespoke Liquid themes, plugins and scripts.
- Integrate third-party services, booking engines, payment gateways, Google Analytics and Maps APIs, REST and SOAP endpoints across client platforms.

C#, .NET, Flutter, Laravel, JavaScript, SCSS, Gulp, MSSQL, MySQL, Microsoft Azure, Git, Appveyor, Laravel Forge, Cloudflare

Full Stack Software Engineer — Textus Technology Pvt Ltd

2016 — 2019

- Developed and maintained windows based application and web applications tooling in .NET and MSSQL.
- Delivered backend services and admin tooling in PHP/Laravel and .NET against MySQL and MSSQL.

PHP, Laravel, C#, jQuery, HTML, CSS, SCSS, MySQL, Git

Junior Software Engineer — EDATA Lanka Technologies

2015 — 2016

- Maintained and extended an in-house POS platform and its content management system, both built as C# Windows desktop applications.

C#, .NET Framework, Entity Framework, Windows Forms, MSSQL, REST APIs, GitHub
